Title: E-Commerce Website

Slot: B2+TB2

Date: 5-06-2020

Faculty Incharge: Prof. Suba Shanthini

Team members:

Manya Smriti (18BIT0127)

Disha Bhaglal (18BIT0468)

Vanshikha Singh (18BIT0152)

ABSTRACT

The clothing and fashion industry calls for an eye-catching, trendy and stunning online presence. Our website fulfils the same. Fashion India is an

online fashion store with a sassy and irreverent style and attitude. The e-commerce site sells sarees, dresses, jeans, jackets, shirts, kurtis, trousers, watches, belts, bags, shoes and accessories from Indian and international designers. In addition, it suggest trendy makeup and the makeup that suits one's facecut. Its homepage stands out for its simple, chic and appealing design. The members who have signed up for the website will get exclusive discounts, free delivery and other membership benefits just at 1000 rupees per year.

Electronic Commerce is the process of doing business through computer networks. A person sitting on his chair in front of a computer can access all the facilities of the Internet to buy or sell the products.

Unlike traditional commerce that is carried out physically with effort of a person to go & get products, ecommerce has made it easier for human to reduce physical work and to save time. ECommerce which was started in early 1990's has taken a great leap in the world of computers, but the fact that has hindered the growth of e-commerce is security. Security is the challenge facing ecommerce today & there is still a lot of advancement made in the field of security.

This is an E-Commerce website of a company named "Fashion India". It primarily focuses on selling clothing, home appliances and electronic gadgets facilitated through online transactions. The products available on the page are further divided into categories: Men's Fashion, Women's Fashion, Kid's Fashion, Furniture, Home and Décor and Health and Fitness. Users can add chose items and add them to the cart, and later proceed to checkout.

The first page asks the User to either Login or Signup, which will be two other pages. There is also an "Explore" through which the user would directly be taken to the home page, but they will have to sign-in while purchasing the products.

Once Logged-in, the User can explore all the categories and add the item of their liking to the cart. There is an option "Best Deals" where the most discounted items will be displayed. There is also a search field in the navbar

to pick out exactly what the customer wants. User Profile details can be changed anytime by accessing the Profile option from the Navbar. This site is interactive and is created using HTML, CSS (including Bootstrap 4 classes), PHP and MySQL.

Each product page displays:

1. Multiple high-quality images of the products.
2. A product description.
3. Size guide.
4. Payment options.

Not only this it has a best Deal of the day which shows the cheapest and most trendy product under every category with dynamic product advertisement (product changing every second) on the left corner which will directly redirect one to the cart .

Apart from this in order to keep the viewers entact, we have sale on a daily basis with a timer on under every category.

Shoppers can also view details about each product, read customer reviews and view related products.

List of PHP features included in the project

- 1) Timer for Sale
- 2) Automatic Slide Changer
- 3) Function, Classes and variables used in Best Deal Page.
- 4) Php database connection (fetch->assoc())
- 5) To retrieve data \$_POST() \$_GET FUNCTION function.
- 6) Arrays
- 7) Concatenation
8. Sessions
9. Cookies

10. Regular Expressions for E-Mail Verification used in the Login and registration page

11 Displaying image through the database

12 Cart for adding items that needs to be bought

i. Rainbow Eyeshadow

Put the neutral palette you've been using for all of eternity down. Spring calls for color, and subtlety is overrated. Rainbow-dusted eyes are truly picturesque. Why pick one color when all can collectively look cohesive and cool? The final result looks more complicated than the process actually is. Simply place the shades of your choosing in concentrated areas on your eye, then take a fluffy brush to blend.

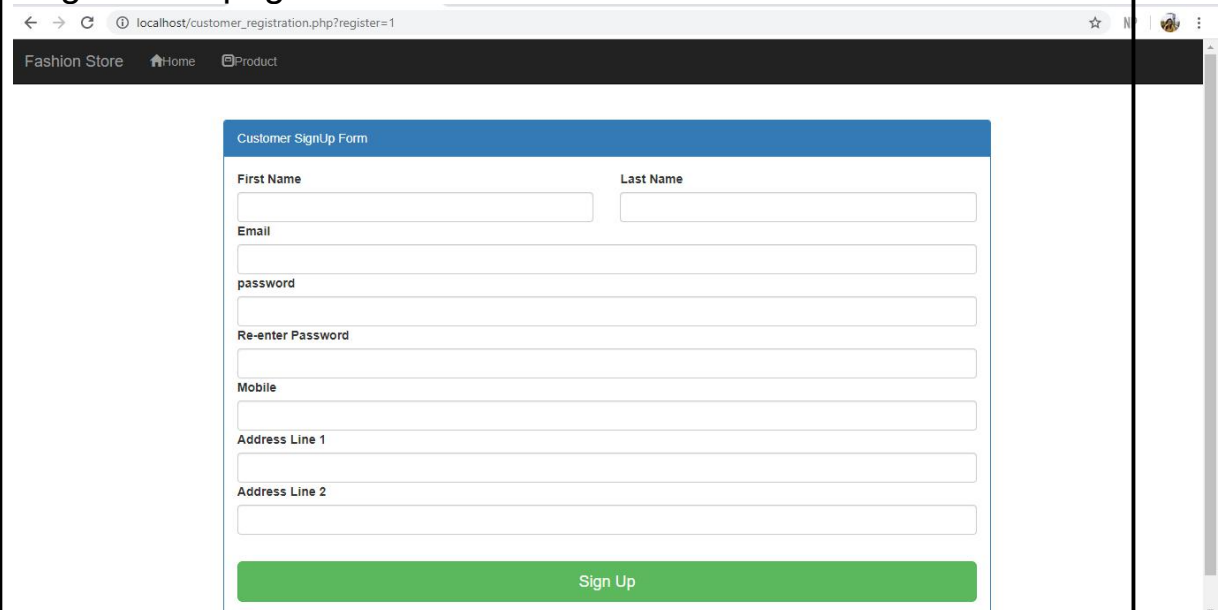

Login page:

The screenshot shows a web browser at the URL `localhost/login_form.php`. The page has a dark header with the text "Fashion Store" and navigation links for "Home" and "Product". The main content area features a "Customer Login Form" with a blue header. The form includes input fields for "Email" and "Password", a "Login" button, and links for "Forgotten Password" and "Create a new account?". A small status bar at the bottom left of the browser window displays the URL `localhost/login_form.php#`.
